DT in EYFS at Wickhambreaux

I have access to a variety of DT opportunities through continuous provision, where I can independently explore and experiment with different materials, tools, and techniques to develop my creative ideas. These opportunities reflect the learning taking place through our topics, allowing me to apply and extend my understanding in meaningful ways.

I can look and talk about what I have designed and how I plan to make my product (either with a grown-up, a friend, or in a group discussion).

I can enjoy using a range of materials, tools, and techniques to create my product (pencil, paint, chalk, crayon, and pens).

I can explore a range of techniques to make products (drawing, cutting, painting, printing, layering, and modelling).

I can begin to share my products and explain how I made them (either with a grown-up, a friend, or in a group discussion).

I can begin to explore different techniques such as glue, staples, and printing on fabric (paper, wood, metal, and fabric).
